MBE/WBE This contract will be awarded in compliance with Chapter 2-9C of the City Code (Minority-Owned and Women-Owned Business Enterprise Procurement Program) No subcontracting opportunities were identified, therefore, no goals were established for this solicitation

This contract will assist Austin Energy in identifying commercial accounts that appear to be involved in the theft of service An analytical approach is used where no visible physical evidence has been previously discovered to indicate theft of service Benefits of the service include increased revenue with existing resources, detection of metering and billing errors, deterrence of future theft of service, and reduction of lost and unaccounted-for energy service It also provides monitoring for theft and metering errors in automated metering environments

Detectent is the only vendor with the knowledge, expertise and technical solution available to meet all of the requirements of Austin Energy Detectant is the only known source that provides detectant services that target the commercial accounts sector and are hardware independent
